

Grow Kindness

Kindness towards the environment while spending time as a family is a great way to spend a day!

First: Help the environment by planting pollinators! Even if you think you lack a green thumb, it's worth it to still try. So, identify some flowers you would like to grow by talking to a local greenhouse. They can even advise you as to which are easier to grow than others.

Second: Based on what the flowers need to thrive, select an ideal location to plant your garden. Then plant the seeds and watch them grow!

Third: To make even more of an environmental impact, you could make a community garden, but be sure to check for permission for the location you are considering.

Fourth: Another way to spread environmentalism and kindness, you could get a bunch of small pots and give your neighbors each their own plant. You could even decorate the pot with little positive messages!

Take it a step further: Apply for a Random Acts grant to help offset the cost of supplies to have an even bigger environmental impact.

Need help completing your kindness act?

Reach out to our Student Group Coordinator for help with planning or assistance.

Need help with funding for your act? We can help you! Apply on the Random Acts website.

Changing the world one random act of kindness at a time
